

ShoreStation®

At the forefront of shorefront since 1959

CLASSIC SECTIONAL DOCK

Why ShoreStation?

Sure it looks great, but a dock is about more than just style - it also has to be safe, smart and easy to maintain. The difference here is in the details...

Safe For Everyone

Your dock needs to be safe and enjoyable for everyone. To make that happen you've got to have the details right, like the narrow width and sturdy handrails on this Aqua Step. It provides a safe route in and out of the water for kids, seniors, and dogs.

Versatility for the Way You Live

Your dock has to be able to grow and adapt to fit your lifestyle. The modular design of Genuine ShoreStation Dock gives you the versatility to rearrange your sections and create different layouts from season to season. Add sections and new accessories as you go.

Accessories Galore

Go ahead – express yourself! The wide variety of accessories makes it easy to get creative and customize your layout. From functional items like lights, to decorative accents such as flagpoles – they're all designed to look right, fit right, and work right. That's because they're all Genuine ShoreStation!

Easy Installation

Listen up all you "do-it-yourselfers"... This layout can be installed by two people in less than one hour! In the time it takes to install an ordinary dock, you could install this one, take it back out and reinstall it in a different layout.

Looks Do Matter

Okay, admit it - you have cruised around the lake checking out your neighbors' homes. You understand how a nice looking dock can make or break your lakefront. These wide sideboards and color-matched accessories create a clean, traditional look that never goes out of style.

Your dock is the heart of your lake home. It has to stand up to the daily punishment of boats, rough water, the sun, the kids - you name it. It has to do all this and stay trouble-free, so you can relax and focus on more important things... like where the dog hid your flip-flops.

That's the essence of lakefront living. That's why ShoreStation.

More Time to Play

EON-Marine® sideboards. Powder-coated aluminum deck planks. Heavy-duty galvanized leg frames. Aluminum leg extensions. Stainless steel hardware.

See anything on this list that requires regular maintenance or work of any kind?

Nope... (that's kinda the idea.)

Peace of Mind

Since 1959, the ShoreStation name has stood for rugged, dependable waterfront equipment. Rest assured that these products are designed for the long haul and backed by one of the best warranties in the business.

Keepin' it Simple

Everything about this dock has been engineered to be easy... Accessories mount quickly and easily without tools. Sections lock together with a simple spring-loaded pin mechanism. Leg height can be adjusted without tools. All this means is fewer headaches for you.

Stability = Safety

Flimsy, unstable dock can be a real hazard, so play it safe with rock-solid Genuine ShoreStation Dock. This A-Frame stance provides a wider base for a level of stability and safety you won't find in ordinary docks.

All ShoreStation products come with one of the best warranties in the business.

For more information contact your local dealer.

1 Choose Your **DOCK STYLE**

ShoreStation Classic Sectional Dock welded deck sections are available in your choice of **Low Maintenance Aluminum** or **Nostalgic Cedar**. All hardware and component parts are constructed of the highest quality materials. From the galvanized steel leg frames to the stainless steel cotter keys, everything is designed with durability in mind.

**Low Maintenance Aluminum**

Our aluminum planking is coated with a durable, sand-beige, powder paint. This non-skid finish is cool to the touch and best of all there are no splinters, no sharp edges and no nails!

Available with your choice of sideboards:

NEW Eon® Sideboards (shown above)

Optional Cedar Sideboards

Beautiful western red cedar with a soft rolled edge.

**Leg Frame Options**

Our unique leg frame design allow for maximum adjustability and are available in either Aluminum or Galvanized Steel.

Aluminum

Galvanized Steel

**Nostalgic Cedar**

Nothing can match the lasting beauty and durability of western red cedar. These sections feature only the finest, beveled-edged cedar planks with matching side-boards for a sturdy, traditional look. Whether you choose to stain your dock, or leave it unfinished, you'll be amazed by the durability of this natural wonder.

NEW EON MARINE® SIDEBOARDS & ACCESSORIES**The Dock of Ages**

Eon Marine® is a unique, 100% synthetic material that offers the beauty of natural wood, without all the maintenance. It is resistant to heat, cold, mold, mildew, UV rays, and insects, so it stands the test of time.

That's why this material carries a 25 year limited warranty.

**EON****NEW****6 Months****16 Months****WOOD**

To prove that the enduring beauty of Eon is second to none, Atlas Material Testing Solutions, an independent third party, performed unbiased, real-life, weather testing of Eon products, natural wood, and some of the leading composite products. The results clearly show how well Eon maintains its beautiful appearance and color over time, outperforming real wood and the composites.

**CLASSIC SECTIONAL DOCK****The Advantages of Classic Sectional Dock**

The Classic Sectional Dock is the most versatile style and perfect for almost any type of lakefront. The foot pads on each of the legs that simply rest on the lake bottom. This allows the dock to work in difficult situations such as steep drop-offs and rocky, uneven bottoms. The various leg frame and extension leg combinations allow it to work in water up to 12' 4" deep.

How It Installs

Classic Sectional Docks are installed and removed one section at a time. The sections are held together by spring-loaded lever locks that can be locked and unlocked without tools. Leg height can also be adjusted easily without tools.

2 Choose Your **LAYOUT**

The versatile, modular design of Genuine ShoreStation Dock makes it easy to create thousands of different layout options. These diagrams illustrate just a few of the possibilities.

Your dealer can help you design a custom layout to meet your needs.

These unique features will help you get creative:

- 4', 6' and 8' section widths*
- 45° angles
- mitered corners
- freestanding swim platforms
- 2' Catwalk sections

More Widths = More Unique Layouts

Mix and match 4', 6' or 8' widths.* Use 2' Catwalk sections for adding narrow walkways off a main dock.

*Actual Width varies from nominal Width. See page 14.

Commercial Layouts

Genuine ShoreStation Dock works great for larger commercial layouts too. The clean, professional appearance is perfect for marinas and condominiums, and guests love all the user-friendly accessories.

From **simple** to **sophisticated**
- the **options** are **endless!**

Design Your Custom Layout Online

Our 3-D Lakefront Layout tool walks through the process of designing your dock. Start with a few sections, then add accessories, boat lifts, you name it! It's easy to use and free. Your ShoreStation dealer can show you how it works.

3 Choose Your ACCESSORIES

One of the most popular features of the Genuine ShoreStation Dock is the wide variety of easily attachable accessories. Many accessories feature our patented "Quick-as-a-Click" connector which allows them to be installed or removed without tools. Constructed of the finest materials, these accessories are specially designed to be useful, as well as compliment the beautiful appearance of your dock. From ladders and dock bumpers to our stylish EON Bench, they're all here and they're all Genuine ShoreStation!

**Flag Pole & Holder**

Dress up your dock and show your patriotic spirit! It comes complete with double harness for flying two flags and extends to a maximum height of 20 feet.

**Dock Bumper**

Big enough to protect your craft above and below the water line, these bumpers install "quick-as-a-click". They are durable, yet flexible to absorb repeated shocks. Available in right, left, and side mount.

NEW!**GlidePole Adjustable Dock Bumper**

Quickly adjusts vertically for various boat heights and water depths with the NEW t-slot design. The aluminum core with UV stable poly sheath are sure to protect your boat while absorbing repeated shocks.

**Gear Tower**

Keep your dock clean and organized with our handy Gear Tower. The large table top is perfect for drinks, a radio, or even for cleaning fish. Life jackets, tow ropes, and towels hang neatly on the heavy-duty storage hooks.

**Solar Dock Light**

Our new solar version of the popular Dock Light is simply brilliant- in many ways! It shines much brighter than solar lights you're used to seeing- in fact, it emits as much light as a 40-watt bulb. And it's all powered thanks to the hi-tech solar panel, which means no wiring, no expense, no worries! Move it wherever you need light, "Quick-as-a-Click".

**Solar Shore Light**

Go green! Integrate the safety and style of your ShoreStation dock onto the land around it. Hey, we even made them easy to transport. The base becomes weighted with the one thing that's always around docks-water! For that reason, it's brilliant next to swimming pools, too.

**Gear Tower w/ Solar Light**

Here's a bright idea- combine the useful table top of our Gear Tower with a trouble-free, no-cost light source. The surface is perfect for drinks, a radio, or even for cleaning fish. Life jackets, tow ropes, and towels hang neatly on the heavy-duty storage hooks. Now you can bring organization and lighting to any place that gets touched by the sunshine.

40-watt Solar Panel, Brilliant LED Light, Maintenance-Free Battery and Solar Charge Controller all packaged in one attractive fixture!

ACCESSORIES

Paddle Board & Kayak Storage Rack

The perfect solution for storing your paddle board or kayak dockside. Simply rest the paddle board or kayak on the rack and fasten with the two easy-release securing straps, ensuring your craft is quickly accessible for your next adventure.

Fits one kayak or two paddle boards.

Shown with two racks on dock bumper.

Dock Ladder

This maintenance-free aluminum ladder features a textured powder-coat finish that provides better traction and is cooler to the touch than steel or wood. The snap-button adjusting mechanism allows it to be raised or lowered in seconds, without tools.

Eon Marine® Swivel Chair

Ideal for fishing or just keeping an eye on the kids. Constructed of beautiful Eon material (See page 5 for details.) to match your dock, this 22" wide chair features 360° swivel action and built-in cup holders. The maintenance-free Eon® material will not splinter or rot and will look like new for years to come.

Eon Marine® Dock Bench

A cozy bench built for two. This 4' and new 6' wide bench is constructed of beautiful Eon material (See page 5 for details.) and features built-in cup holders. The maintenance-free Eon® material will not splinter or rot and will look like new for years to come.

Aqua Step

This mini-version of our popular Shore Steps is the easiest way in and out of the water. The narrow width and sturdy hand rails make it perfect for kids, seniors and even the family dog. The adjustable parallelogram design allows it to fit a variety of dock heights. Now with maintenance-free aluminum steps.

Shore Steps

Create a stylish and safe entryway to your dock with the matching Shore Steps. Available in your choice of 5 or 8-step configurations, Shore Steps feature maintenance-free aluminum steps and an adjustable parallelogram design to fit a variety of inclines. Just like our dock, these steps are specially designed for easy installation and removal.

Easy Does It!

Genuine ShoreStation dock has been engineered to minimize headaches and maximize your play time.

Putting It All Together

Do-it-yourselfers and professional dock installers both agree - Genuine ShoreStation Dock is a breeze to install. Design breakthroughs like these spring-loaded locking pins that connect the sections, make the process fast and pain-free. Whether you prefer to work from the dock or in the water, complete layouts can be installed in half the time of ordinary dock systems.

Assembling The Sections

Simply align the interlocking channels and lift the leg assembly into place.

The Leg Frame Brace fits into a slot on the underside of the dock and is secured to the dock leg pin with a hairpin cotter key.

Adjusting & Leveling

Once the sections are positioned, the installer steps down on the foot pad, setting the leg to the proper height. The cam-action of the **Byro Leg Lock** provides a firm, stable hold and can be adjusted by simply releasing the lever.

Easy Installation

From the dock...

Aluminum dock sections, or any install involving cold or deep water can be done from the dock. To simplify this process, we have developed the unique **Crane Man installation device**. Crane Man acts as your partner in the water allowing a single operator to float dock sections into position and attach them.

...or from the water

Cedar dock sections float and can be installed using our simple **Float-Flip-Fasten** process. *NOTE: Aluminum sections can be installed using this method, using the optional float accessories.*

FLOAT >>>

Inverted with the leg assemblies attached, each cedar section floats easily into place.

FLIP >>>

The offset weight distribution created by the leg assembly facilitates an easy flip into position.

FASTEN >>>

The mounting channel of the new section rests in the channel of the existing section. Simply release the spring-loaded Dock Lever Locks and the two sections become one.

Leg Frames & Leg Extensions Available in galvanized steel or aluminum

For maximum adjustability, **leg frames (LF)** are available in six different sizes: **15", 22", 36", 48", 66"** and **84"**. These leg frames are combined with our adjustable **leg extensions** to conform with the natural slope of the lake bed.

† 84" leg frame is available in galvanized steel only.

Leg Extension Lock

This optional bracket keeps the leg locked at the proper height and prevents it from extending during rough weather.

Classic Seasonal Dock Water Depths

Leg Frame*	Leg Extensions	Height w/Leg Retracted	Height w/Leg Extended	Total Amount of Adjustment	Maximum Water Depth**
LF154	LX10	17"	27"	10"	9"
LF224	LX17	24"	41"	17"	23" (1' 11")
LF364	LX31	38"	69"	31"	51" (4' 3")
LF484	LX49	56"	99"	43"	81" (6' 9")
LF664	LXH64	74"	130"	56"	112" (9' 4")
LF844†	LXH82	91"	165"	74"	147" (12' 3")

1) Dock to Water Line

is measured from the top of the dock to the top of the water. A minimum of 18" is recommended. In many cases, more than 18" is required to accommodate rough waves and other conditions. Your dealer can help you select the proper dock height for your lake conditions.

2) Water Depth

is measured from the water line to lake bed.

Water Depths

This chart lists the standard combinations of **Leg Frames** and adjustable **Leg Extensions** that can be used to reach water depths up to 147" (12' 3").

* Leg Frames are also available in 6' and 8' wide sections.

** Maximum water depth is based on 18" from the top of the dock to the water line. Some lake conditions may require additional clearance.

† 84" leg frame is available in galvanized steel only.
