

Simply brilliant

Our all-new Solar ShoreLight is a bright, simple and cost effective way to go green. The Solar ShoreLight is virtually free to operate and outshines the competition with a powerful LED light that is as bright as a 60-watt light bulb.

Powered by high-tech solar technology, all components are sealed in one sleek fixture for maximum protection from the elements. No more worrying about special wiring or electrical inspections, just sit back, relax and enjoy the extended hours of light.

It's perfect for commercial, public or residential areas with two versions:

Pedestal Option

Light up your back yard, patio, deck, pool, marina, or use it around your RV camper. The durable weather-resistant base provides stability while letting you move the light where you need it. Includes sand beige Solar ShoreLight, Base and Post.

Mountable Option

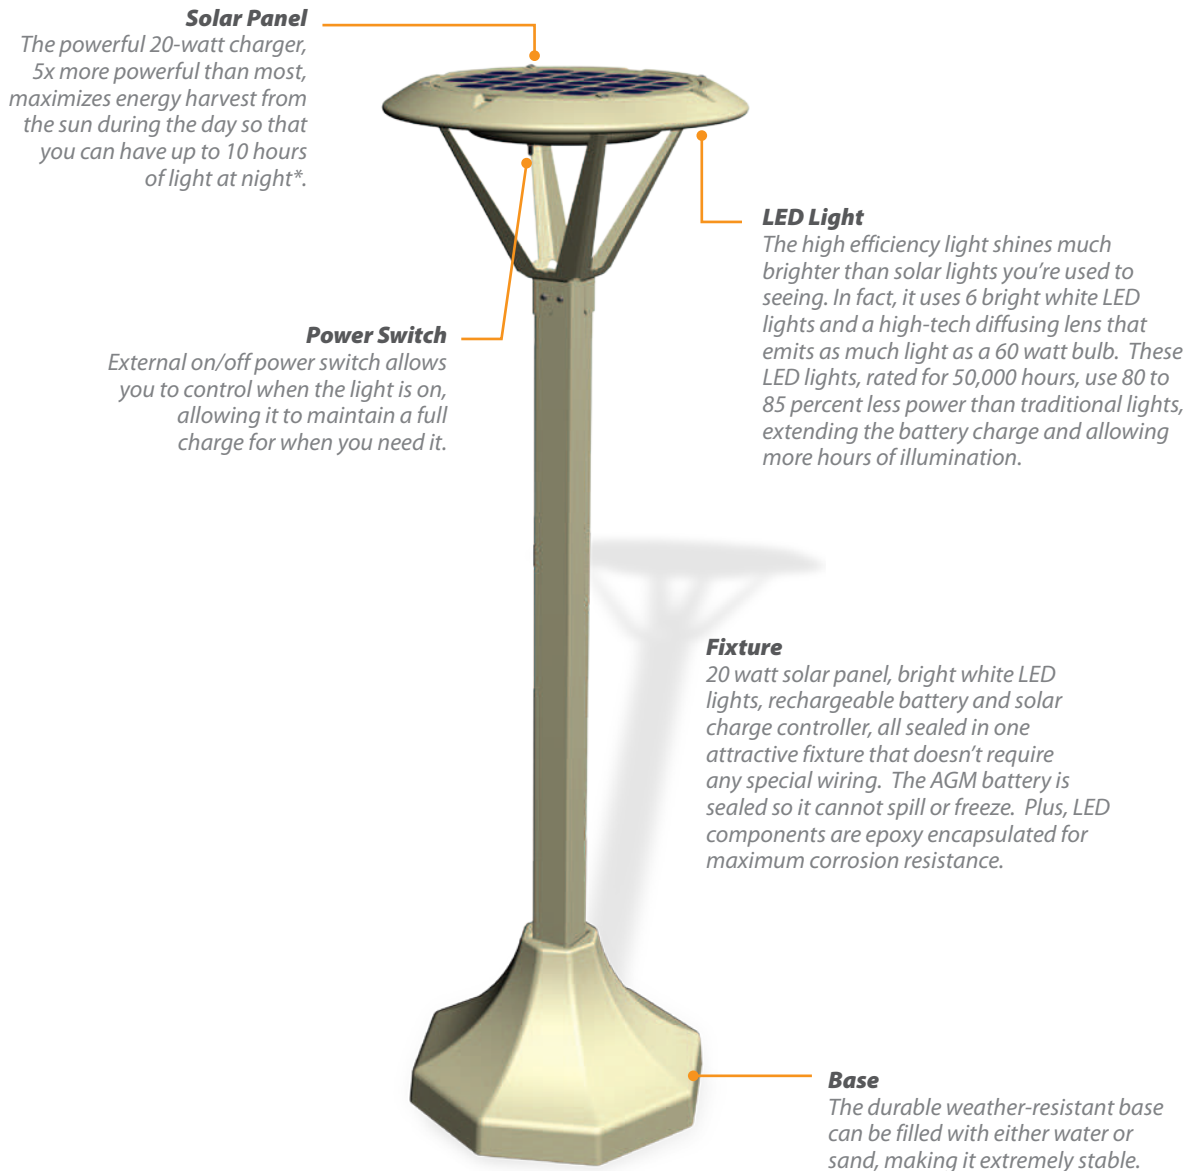

The easy to mount sand beige Solar ShoreLight attaches safely to any 3" or 3 1/2" square post, making it perfect for marinas, bike or walking trails, and outdoor pavilions.

Solar Savings

By using the power of the sun, with no installation and operation costs, the Solar ShoreLight practically pays for itself. Save some green, by going green.

Key Features

Loaded with bright ideas that make your life simple and hassle-free.

*Length of night time illumination is estimated and subject to various factors including geographic location, seasons, weather conditions & exposure to direct sunlight. This light fixture requires several hours of direct sunlight daily to enable it to get a full charge.
